SUMMARY

Java Full Stack Developer (fresher) skilled in Spring Boot, Spring Data JPA, Spring Security (JWT), RESTful APIs, React.js, HTML5, CSS3, JavaScript and SQL (MySQL, PostgreSQL). Built DailyDrop, a full-stack milk and water delivery billing app with secure login and Chart.js dashboards. Mechanical engineering graduate who moved into software through Java Full Stack training and self-learning, with a strong problem-solving and debugging habit.

PROJECTS

DailyDrop – Milk & Water Delivery Tracker
Java, Spring Boot, Spring Security, JWT, Spring Data JPA, PostgreSQL, React.js, Chart.js

- Built a full-stack delivery management app to track daily milk and water deliveries, manage customers, and calculate monthly bills automatically.
- Developed Spring Boot REST APIs for customers, deliveries, billing and sales analytics using Controller, Service, Repository and DTO layers.
- Secured the APIs with Spring Security: JWT authentication, role-based authorization for vendors and customers, and ownership checks so customers see only their own bills.
- Designed PostgreSQL relationships with Spring Data JPA and built React dashboards with Chart.js for sales trends and customer-wise revenue.

SpendLens – Personal Expense Tracker
Java, Spring Boot, Spring Data JPA, React.js, JavaScript, PostgreSQL, REST APIs, Chart.js

- Developed a full-stack expense tracker to record, manage, and monitor personal expenses.
- Built REST APIs using Spring Boot to add, view, delete, and filter expenses by month.
- Used PostgreSQL to store expense records and Spring Data JPA to interact with the database.
- Created an interactive dashboard with expense summaries, budget alerts, and category-wise spending charts using React.js and Chart.js.
- Implemented monthly expense filtering to help users track their spending and remaining budget.

ShopSphere – E-Commerce Web Application
React.js, JavaScript (ES6+), Vite, HTML5, CSS3, REST APIs, Axios, LocalStorage

- Developed a responsive e-commerce web application that allows users to browse products and view detailed product information.
- Integrated the DummyJSON Products API using Axios to fetch and display product data.
- Implemented product search, category-based filtering, and individual product detail pages.
- Developed shopping cart functionality using React Context API and LocalStorage to maintain cart items across page refreshes.
- Designed a responsive UI with React Hooks to manage application state and fetch product data.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, RESTful APIs

Frontend: React.js, React Router, Axios, Chart.js, HTML5, CSS3, Responsive Web Design

Database: MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Eclipse IDE, VS Code

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Collections Framework, Exception Handling, MVC Architecture, SDLC, Debugging & Troubleshooting, Agile

EDUCATION

B.E. Mechanical Engineering, M.A.M College of Engineering and Technology, Trichy — 2021 – 2025
Anna University – CGPA 7.80

HSC, Government Boys Higher Secondary School – 76% — 2021

SSLC, Don Bosco High School – 69% — 2019

TRAINING

Java Full Stack Development Certification, Payilagam, Chennai — 2026
